

Vector Advanced TechDay

Wednesday, June 26th 2019 | Hotel Platina | Cluj-Napoca

Agenda and Information

08:45

Welcome and Introduction

09:00

1 Vector new licensing model

- > New flexible Tool licensing program
- > License models to fit individual needs
- > Administration concept for End User and Enterprise Licensing Programs

09:30

2 Vector Hardware

- > Choose the right network interface for the right task
- > Hardware configuration and usage

10:00

3 CANoe Tips & Tricks

- > Best practice for higher productivity

10:30

 Coffee Break

11:00

4 CANoe Execution Adapter

- > Automate test runs based on your own test execution plan

11:30

5 Vector Testing Solution New Features

Presentation and demo of new features

- > CANoe
- > vTESTstudio
- > VT System

12:00

 Lunch Break

Vector Advanced TechDay

Wednesday, June 26th 2019 | Hotel Platina | Cluj-Napoca

Agenda and Information

13:00	6	Efficient verification and evaluation of measurement files	<ul style="list-style-type: none">> Benefit by using vSignalizer/CANape as analysis and reporting tool
13:20	7	Interested in development of ADAS functions?	<ul style="list-style-type: none">> Vectors high end measurement solution for ECUs and ADAS systems> Verify your ADAS algorithms with CANape DA> Use the vADASdeveloper infrastructure for developing ADAS algorithms
13:45	8	Vector Code testing	<ul style="list-style-type: none">> Use VectorCAST to reduce time, effort and cost of software validation> Basics of code coverage analysis> Unit integration and system tests
14:30		Coffee Break	
15:00	9	Secure Onboard Communication (SecOC) – security support in CANoe	<ul style="list-style-type: none">> Simulate the communication of secured ECUs and networks> Test the Security Mechanism
15:30	10	vVIRTUALtarget – Virtual Developing and Testing AUTOSAR Software	<ul style="list-style-type: none">> Generate virtual ECUs for all typical AUTOSAR-4 projects> Develop and test functional software unchanged in combination with a behavioral model or with virtualized, complete AUTOSAR basic software
16:00	11	CANoe as Open Environment	<ul style="list-style-type: none">> How to simply integrate CANoe into a heterogeneous tool landscape due to its openness> Which interfaces CANoe offers and how you can benefit from them: FDX, FMI, XIL API, etc
16:30		Q & A / Official End of Event
